

(a) Ball, pegs 2 and 3, without friction: a segment, $d(\mathcal{P}^{\mathrm{PwoF}}) = -0.50$.

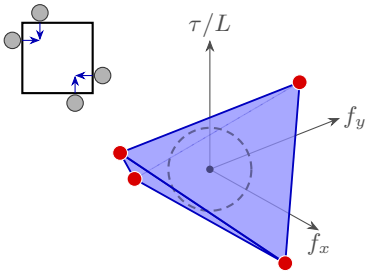

(b) Ball, pegs 2 and 3, with friction ($\mu = 0.3$): $d(\mathcal{P}^{\mathrm{HF}}) = -0.24$.

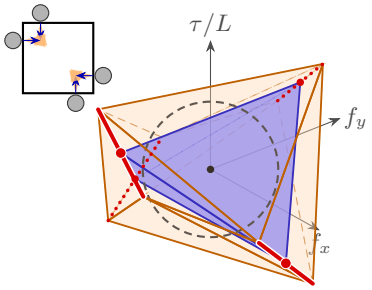

(c) Ball, three pegs, without friction: a flat triangle, $d(\mathcal{P}^{\mathrm{PwoF}}) = 0$.

(d) Ball, three pegs, with friction ($\mu = 0.3$): $d(\mathcal{P}^{\mathrm{HF}}) = 0.30$.

(e) Block, four pegs, without friction: a tetrahedron, $d(\mathcal{P}^{\mathrm{PwoF}}) = 0.35$.

(f) Block, four pegs, with friction ($\mu = 0.3$): $d(\mathcal{P}^{\mathrm{HF}}) = 0.58$.
